

That's it about creating and running the R script file!

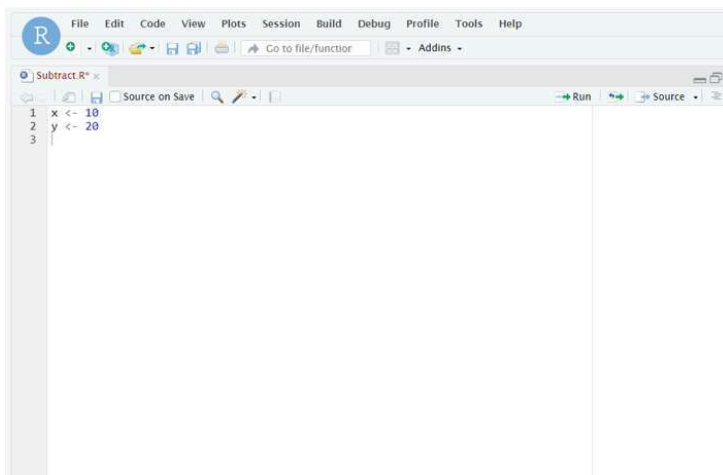

Exercise: Practice Tasks

Task 1: Create a new R script

- Assign two variables where $x = 10$ and $y = 20$.
- Save the file as **Subtract.R**.

▼ Click here for solution

```
x <- 10
y <- 20
```

Task 2: Subtract x from y . Store in variable `result` and print the output.

▼ Click here for solution

```
x <- 10
y <- 20
result <- y - x
print(result)
```
